GMP020KIT

GONDOLA MOVING STARTER KIT

Save labor by moving loaded gondola shelving runs with as few as three people. Our system can move all standard gondola shelving from Lozier, Madix, Streater, and more.

There is no need to empty or wrap shelving to secure product—our system lifts gondola standards effortlessly and rolls smoothly without dumping product. It can also easily move heavy aisles, such as soda, alcohol, and water.

TIME AND LABOR EFFICIENCY

An average four-person work team can move a 76' run (with kick plates already removed) in about 45 minutes. The system requires only three people to operate.

Each Starter Kit ships on two custom-made dollies with all parts and tools to move 72 linear feet of gondola shelving. Add-on kits are available with 10 or 20 skates for longer runs or to allow multiple runs to be moved in conjunction.

GMP020KIT

COMPONENTS OF THE GONDOLA MOVER

ADJUSTABLE STOPS ON A SKATE

Stops securely lock gondola footing in place, allows for multiple depths

"L" BRACKET WITH PIN

Locks the gondola shelf feet and secures shelf on the skates

RAKE

Used to clean up debris beneath shelves

SCRAPERS

Used to scrape stuck on debris off the floor

LIFTER

Lifts gondola shelf footings up to slide skates beneath

SKATE CASTER

Heavy duty, durable casters for multi-directional movements

HALF-SIZE SKATE

Used for moving end caps or short standards due to roof support column

FULL-SIZE SKATE

50"-long skate for moving full-length shelves

PULL HOOK

Used to move skates with gondolas upon them

Gondola Moving Units are available for purchase or for rental for one-week or one-month periods. Ships FOB from a Peggs facility.
