GONDOLA MOVING SYSTEM

Available for Sale or Rent

Save labor by moving loaded gondola shelving runs with as few as three people. Our system can move all standard gondola shelving from Lozier, Madix, Streater, and more. There is no need to empty or wrap shelving to secure product—our system lifts gondola standards effortlessly and rolls smoothly without dumping product. It can also easily move heavy aisles, such as soda, alcohol, and water.

TIME AND LABOR EFFICIENCY

An average four-person work team can move a 70' run (with kick plates already removed) in about 45 minutes. The system requires only three people to operate.

STARTER KIT

Each Starter Kit ships on two custom-made dollies with all parts and tools to move 72 linear feet of gondola shelving. Add-on kits are available with 10 or 20 skates for longer runs or to allow multiple runs to be moved in conjunction.
