SOLID DECK ROLLING STOCK TABLE

The Rolling Stock Table Transport Cart is designed to move bulky and heavy products to and from the sales floor. The solid galvanized deck workspace helps to prevent rusting while rubber corner bumpers protect store fixtures.

Models (see page 2) include optional handle, 3-sided lip, solid galvanized lower shelf, heavy duty construction and a variety of wheel configurations.

PRODUCT SPECIFICATIONS:

KNS1636SC

SOLID DECK ROLLING STOCK TABLE

The Standard Rolling Stock Table provides a large flat work-space to maximize box movement (3-sided lip is optional).

Standard 4-Swivel/No Handle configuration allows for greatest mobility in any direction—great for tight backrooms or sales floors

Optional 2-Swivel with Handle configuration makes it easier cart to maneuver over long distances or uneven/ non-level floors

Total Capacity: 1000 lbs

KNS1636SC

OPTIONS:
