# KNS1836SC

## SOLID DECK ROLLING STOCK TABLE

18" x 36" rolling table transport cart, also available in 16" (KNS1636SC), is designed to move bulky and heavy products to and from the sales floor. A solid galvanized deck work space helps to prevent rusting. Rubber corner bumpers protect store fixtures.

- Standard rolling table provides a large flat workspace to maximize box movement
- Optional solid galvanized bottom shelf/deck available
- Shown at left with optional 3-sided lip to allow for easy loading of boxes while keeping items secure (cart without lip is standard)
- Standard 4-Swivel / No Handle configuration allows for greatest mobility in any direction – great for tight back rooms or sales floors
- Optional 2-Swivel with Handle configuration makes it easier cart to maneuver over long distances or uneven/non-level floors

### OPTIONS:

- Frame available in any color finish or texture
- P&H Super Wheels (exceptionally quiet, longer lifespan, added durability)
- Rear swivel or rigid caster options
- 3-sided lip
- 2-Swivel with Handle configuration

### PRODUCT SPECIFICATIONS:

#### Total Capacity

1,000 lbs
