Instructions and warnings permanently attached. ▼

5. Meets all applicable standards and regulations
6. Easily nests to conserve floor space
7. Warning graphics and instructions permanently molded into Safe-Dock
8. Simple installation - permanently attaches to any shopping cart with two u-bolts

A safer alternative for personal infant carriers.

Personal infant carriers are not designed to be placed on shopping carts and account for hundreds of accidents in retail stores each year. In fact, car seat and infant carrier manufacturers warn against using these products with shopping carts. The Safe-Dock is a safe and convenient device specifically designed to hold a personal infant carrier while shopping.

The deep contoured shape securely holds infant seats.

**⚠ WARNING**

Your child can fall out of the cart and suffer a serious head injury.

<b>ALWAYS</b> buckle up child in car seat and fasten securely.	<b>STAY</b> with your child at all times.	<b>Do NOT</b> allow child to ride in basket.	<b>Do NOT</b> use your own personal infant carrier or car seat.

**ONLY** use cart seat for children ages 6-48 months and 15-35 lbs.

The shopping cart standard and new warning prohibits consumers from placing their infant carriers directly on a shopping cart.

Now with the innovative and simple Safe-Dock, personal infant carriers can be used safely with shopping carts.

Available in red, gray and blue.
