COVERED CART CORRAL

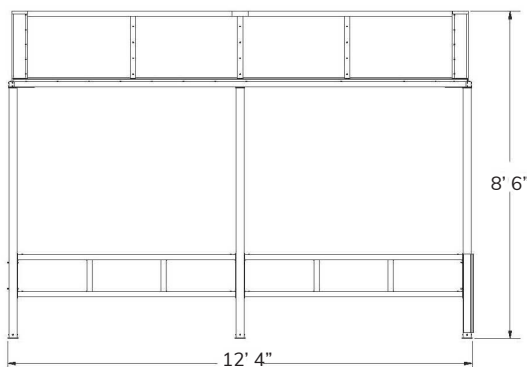

Covered Cart Corrals protect shopping carts from the elements (rain, snow, and UV damage), ensuring they're dry and cool to the touch. Keeping rain and snow off carts prevents them from tracking water into the store (which can lead to slip and fall hazards), lowering the risk of accidents and injuries to employees and retail customers. Helping to maintain cart conditions and usability by decreasing wear and tear can contribute to a reduction in replacement and maintenance costs.

FEATURES:

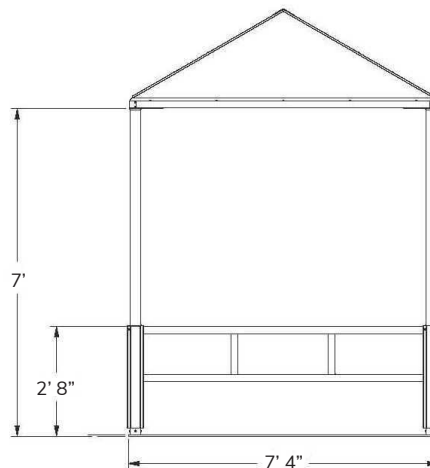

- Standard corrals come with aluminum roofing and e-coat-dipped steel frames.
- All-aluminum corrals are also available and offer superior corrosion resistance.
- Corrals can be lag bolted directly into concrete or rest upon supplied concrete ballasts.
- Weather windows keep blowing snow and rain off of carts.

OPTIONS:

- Optional plastic weather windows available for 3 sides (Weather Windows **OCCS30812WIN**)
- Custom sizes and finishes available
